Gable End Overhang: Existing Homes Only

Retrofit for Ladder Framed Gable Overhang 12–18 in. Depth

Applicable Conditions

1. Existing homes only
2. FORTIFIED Silver™ and FORTIFIED Gold™ designation levels

Abstract

Older homes are often constructed with overhangs greater than 12 in. in depth. This bulletin provides prescriptive instructions, for the site condition limitations outlined below, on how to retrofit ladder framing on gable end overhangs to achieve a maximum depth of 18 in. from the face of the wall. Gable ends with ladder framed plywood/OSB overhangs greater than 18 in. seeking a Silver or Gold designation will require a site-specific engineered solution.

Site Condition Limitation
Exposure B
Mean Roof Height = 30 ft maximum

Requirements

FORTIFIED Home™ requirements have not changed. This prescriptive retrofit utilizes 2x framing members and 7/16-in. structural sheathing (plywood or OSB) at soffits to form a structural box which will enable an existing gable overhang to extend 18 in. to the outermost surface of the overhang without site-specific engineering.

Documentation Requirements

All components installed must be documented with photos and verified by a certified FORTIFIED Evaluator. Required photos include all installed framing and sheathing. Include photos of fasteners that clearly indicate sizes and spacing of the fasteners installed as well as at least one overview showing the continuous ledgers in place.
For Evaluators Only: Evaluation Form Input

Overhang retrofit documentation photos, material invoices, etc., should be uploaded into the SOFFIT section of the evaluation in FOCUS.

Retrofit Specifications

1. 7/16-in. structural sheathing (plywood or OSB) fastened to 2- x 4-in. ledgers with 8d nails at 3 in. o.c. at each end. Provide 2- x 4-in. blocking at all soffit panel joints.
2. 2- x 4-in. continuous ledger fastened to wall framing through exterior sheathing with #10 x 4-in.-long deck screw and a 1.5-in.-diameter washer at 6 in. o.c. and 3 in. from each end of the ledger.
3. 2- x 4-in. continuous ledger fastened to 2- x 6-in. fascia with #10 x 3-in.-long deck screw and a 1.5-in.-diameter washer at 8 in. o.c. and 3 in. from each end of the ledger.
4. 2x minimum fascia board.
5. Nail the roof deck to the fascia and first and second rafters with 8d ring shank nails at 4 in. o.c. (minimum 1⅝-in. penetration).
