

Don't Just Build a Home. Make it Strong.

A FORTIFIED home is built to better withstand severe weather, helping protect your home when it matters most.

Research-based Storm Protection

FORTIFIED homes meet a standard based on decades of research and real-world testing, using construction methods proven to better protect homes from severe weather like high winds and heavy rain.

Verified Materials and Installation

The construction of FORTIFIED homes is documented and independently verified by trained third-party evaluators to ensure they meet rigorous standards for durability and performance.

Potential Insurance Savings*

Across the country, many insurers offer discounts for FORTIFIED homes, helping you save money year after year, while also increasing your home's resilience, making FORTIFIED a smart investment.
