The FORTIFIED Network

How To Register and Create an Account

The FORTIFIED Network is an online community where service providers can learn about program updates and get answers to FORTIFIED questions. It's also home to your provider profile, where you can manage your account and provide your eligibility documentation (proof of insurance, certification, licenses, etc.). Let's get started.

Go to The FORTIFIED Network (ibhs.force.com) and complete the brief provider application.

- A Select the type of service you will provide (roofer, evaluator, professional).
- **B** Enter your individual information.
- C If your company is already listed in the directory, find it and select it from the Company Name list.

If your company is not on the list, select "Other".

- Read the statement at the bottom of the application, and if true, check the box.
- E If your company was not listed, check the final box to have it appear in the FORTIFIED Provider Directory
- 2 After submitting your application, you will receive two emails. The first, from a member of the FORTIFIED team, will confirm your registraion to The FORTIFIED Network.
- The second email, from the FORTIFIED Service Provider Network, welcomes you and includes a unique link that will take you the final step of the registration process. Click the link.
- 4 Create your personal password for The FORTIFIED Network. It must contain at least eight characters (with at least one letter and one number).

Then, click "Change Password."
